

Danush Tej Yadav S

danushtejyadav@gmail.com | +91-6363927250 | github/danushtejyadav | linkedin/danush-tej-yadav-s/

SKILLS

- **Languages:** Java, python, SQL
- **Technologies:** SpringBoot, Flask, RESTful APIs, ReactJS, Junit, Hibernate, wiremock
- **DevOps:** AWS, OCI Cloud architecture (learning), Docker, Git
- **Databases:** MongoDB, PostgreSQL

EXPERIENCE

- **Version 1** Sep 2025– present
IT Intern Bengaluru, India
 - Designed, developed and delivered a **full-stack** Medical Documents Translation and Simplification using AWS Translate and OpenAI LLM (AWS Bedrock) with Django framework and React (frontend).
- **Delta Exchange** Sep 2024– Dec 2024
Security Applications Development Intern Bengaluru, India
 - Designed, developed, and deployed a **full-stack** Unified Event Management Dashboard, aggregating logs from various services including AWS, Slack, and Google via their **RESTful APIs** improving **response time by 50%**.
 - Engineered and deployed a **full-stack Asset Management Tool** with **MongoDB** for authentication.
 - Researched and documented **best practices** for **web application security** and **incident response**.

PROJECTS

- **Unified Event Management Dashboard**
Python3 / ReactJS / Boto3 / AWS SDK / MongoDB / Sophos API / AWS API / Twingate API
 - Engineered a **full-stack** Unified Event Management Dashboard using **ReactJS** for the frontend and **Python/Flask** for the backend **RESTful API**.
 - The system aggregates logs from multiple sources like AWS and Slack to provide **real-time insights**, reducing **incident response time by 50%**
- **IntelliQuery – GenAI based educator**
Python / LLaMA 70B / Flux AI / Deepgram / Bhashini API / Flask
 - Developed a **full-stack application** leveraging a **RESTful API** built with **Flask** to connect a **Python** backend to a user-facing interface.
 - The pipeline integrates multiple **third-party APIs** (Bhashini API, Deepgram) to process and deliver content.
- **Stock Market Predictor**
Python / Reinforcement Learning (DQN) / Streamlit
 - Designed and built a predictive modeling application using **Python**, demonstrating strong **problem-solving skills** and the ability to **implement complex algorithms**. Developed a custom reward logic and **optimized** the training process.

POSITIONS OF RESPONSIBILITY

- **AIVIS - ML Club, BNMIT | Founder, Secretary,** Feb 2025 - present
 - * Founded and manage club activities; **mentor** members.
 - * Conducted **PromptKraft** – a workshop on **prompt engineering**.
- **Hashvault club BNMIT | Founding committee, Head of Public Relations,** July 2024- present
 - * Coordinated **Room Raid** – a **CTF-style hackathon** with **60+ teams**.
 - * Managed **event planning**, registrations, and logistics.

ACHIEVEMENTS

- **1st Place – DevHack**, National-level Hackathon by **IIT Dharwad**
- **1st Place – Mindscape** by **IBM technologies**
- **2nd Place – CodeCrunch** by **MATLAB (MathWorks)**

EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
B.E. (AIML)	BNM Institute of Technology	8.72 (Till 6th sem)	2022-2026
II PU	RV PU College (State)	91.8%	2022
Class X	Jnanodaya School (CBSE)	93.6%	2020
